Software Engineering Technology - Artificial Intelligence (Co-op) student with hands-on academic experience in Python, C#, JavaScript, SQL, web development, database systems and software engineering. Brings 20+ years of professional experience in leadership, client relations, business operations and project coordination, combined with current technical training in AI and software development.

PROFESSIONAL SUMMARY

- Hands-on experience applying object-oriented programming, software requirements, UML modelling, testing, quality assurance and SDLC concepts.
- Developed database-driven and web applications using Python, C#, JavaScript, HTML/CSS and SQL, with experience in Linux/Unix environments.
- Experienced in requirements analysis, technical documentation, SRS preparation, use cases, CRC cards and software/system diagrams.
- Strong analytical, communication and collaboration skills developed through leadership, sales, client service and business management roles.
- Comfortable with Git/GitHub, Visual Studio, Visual Studio Code, SQL Developer, Eclipse, Microsoft Visio and Microsoft Office.

KEY SKILLS

Python / Pandas	C# / OOP	JavaScript / HTML / CSS
SQL / Database Concepts	Software Requirements / UML	Testing / QA / SDLC
Git / GitHub	Linux / Unix	Problem Solving / Teamwork

EDUCATION

Software Engineering Technology - Artificial Intelligence (Co-op), Advanced Diploma — Jan. 2026 - Expected 2029
Centennial College, Toronto, ON
Relevant studies: Python, C# Programming, JavaScript, Web Interface Design, SQL/Database Concepts, Linux/Unix OS, Software Engineering Fundamentals

General Arts and Science — 2025
Sheridan College, Ontario

Bachelor Degree in Business Administration — Apr. 2004
University of Sana'a

Professional Insurance Certificate (PIC) — 2013
Chartered Insurance Institute (CII), United Kingdom

SELECTED PROJECTS

MemoryKeeper - Software Requirements & System Design

- Designed requirements and system models for an application supporting individuals with Mild Cognitive Impairment and caregivers, including patient daily support and caregiver dashboard functions.
- Prepared SRS documentation, use cases, CRC cards and UML-style workflow diagrams covering authentication, reminders, mood entries and caregiver alerts.

Electronic Marketplace - Team Software Engineering Project

- Collaborated in a four-member team to design a marketplace for new and used products with Buyer, Seller and Admin roles, product browsing/filtering, seller contact and role-based dashboards.
- Contributed to interface planning, requirements, integration and workflow modelling, including login and role-based processes.

BikeStore Database - SQL

- Worked with a relational BikeStore database containing products, customers, orders, stores, staff and inventory; wrote SQL queries using joins, grouping, date filtering and set-based logic.

TECHNICAL & WEB DEVELOPMENT PROJECTS

Python Data Analysis

- Loaded and explored CSV datasets, reported dimensions, data types and missing values, calculated derived metrics, accepted user input and stored results back to the dataset using Python and Pandas.

Web & Programming Applications

- Built responsive multi-page websites and interactive applications using HTML, CSS and JavaScript, including forms, JSON/XHR slideshows and dynamic calculations.
- Developed C# console applications demonstrating classes, encapsulation, inheritance, polymorphism, interfaces, generics and collections.

PROFESSIONAL EXPERIENCE

Co-Founder & Marketing Director - Trend Solutions, Ontario, Canada Sep. 2023 - Present

- Co-founded and lead marketing operations for a full-service marketing and business solutions company, coordinating client requirements, projects and cross-functional delivery.
- Led digital marketing strategies and integrated campaigns for a portfolio of companies; developed brand identities, visual designs and business solutions.
- Successfully executed 118+ events across the region and contributed to a Best Design Award at Expo 2024 in Saudi Arabia.

Sales Manager - ADS GROUP, United Arab Emirates Jul. 2018 - Jan. 2020

- Managed sales targets, market research, client relationships and team performance for a multi-division company providing event management, IT solutions and related services.
- Coordinated meetings, trade shows and events from planning through execution while maintaining brand consistency and customer service standards.

Account Manager - Nasco Insurance Group, Jeddah, Saudi Arabia Sep. 2018 - Dec. 2018

- Managed client accounts and supported relationship development in a professional insurance services environment.

Head of Insurance Department - Baghlaf Al Zafer Holding Group, Jeddah, Saudi Arabia Feb. 2005 - Aug. 2018

- Led general, medical and life insurance operations, developing extensive experience in team leadership, analysis, client service and business administration.

ADDITIONAL EXPERIENCE

Supervisor - Methaq Takaful Insurance Company Saudi Arabia, Jeddah | May 2003 - Jan. 2005
Sales Representative - SIJ Insurance Co., Jeddah | Mar. 2001 - Apr. 2002
